

DG Series High Capacity Force Gauge

The CHATILLON® DG Series mechanical force gauge is ideal for a wide range of force testing applications up to 500 lbf (2.5 kN). Based on our popular DPPH Series force gauge, the DG Series features a larger, 2.25-inch dial for improved resolution and readability, peak hold button, durable plastic housing, universal mounting plate, ergonomic shape and improved accuracy of $\pm 0.5\%$ of full scale. The DG gauge is an excellent, economical solution for tensile or compression testing.

The DG Series may be used as a hand-held device or equipped with an optional handle set for two-hand operation. It is ideal for test stand applications, and when combined with the MT500 Series mechanical test stand, offers you a versatile, economic test system with a capacity of up to 500 lbf (2.5 kN).

The DG Series features an easy to read concentric dial that measures clockwise only. Dial rotates 360-degrees for taring. A peak hold switch captures peak readings and can be easily and quickly returned to zero. A mechanical overload feature protects the gauge from damage. Available in lbf, kgf or N units of measure. DG Series gauges come complete with protective carrying case and a set of stainless steel attachments. A Certificate of Calibration with NIST Data is supplied standard.

FEATURES

- Easy to Use, Durable Construction
- Tensile or Compression Testing
- Intrinsically Safe
- Capacities Up to 500 lbf (200 kgf, 2.5 kN)
- Push or Pull Operations
- Tare Ring
- Peak Capture
- Universal Mounting Plate
- NIST Calibration with Data

SPECIFICATIONS

Accuracy:	$\pm 0.5\%$ of Full Scale
Overload Capacity:	110% of Rated Capacity
Maximum Overload:	150% of Rated Capacity
Tare Capacity:	10% of Rated Capacity
Dial Resolution:	0.5% of Full Scale
Deflection:	10mm (.394 inches) at Full Scale
Operating Temperature:	+40°F to +110°F (+5°C to +45°C)
Instrument Weight:	4.7 lbs (2.12 kg)
Shipping Weight with case:	8.4 lbs (3.80 kg)
Warranty:	2 Years
